

# Mineral of the Month Club Newsletter

**November 2017**

Hello Mineral of the Month Club Members,

Another holiday season is upon us and here at Mineral of the Month Club it will also be a season of change. It has been a fun journey and a true blessing to get to know all of you members over these last several years. We have found that the 2 on-line shops that we have is a vessel that allows us to reach a broader range of rock hounds. Though we will be sorry to see Mineral of the Month Club as we know it come to an end, we will continue to provide minerals and resources to the rock hound community

December will be the last mailing to all of you and after the December 1<sup>st</sup> billing we will discontinue all recurring billing so you will not be billed going forward.

We hope that you will continue to make purchases through our on line shops: [www.etsy.com/shop/CelestialEarth7](http://www.etsy.com/shop/CelestialEarth7) and [www.celestialearthminerals.com](http://www.celestialearthminerals.com)

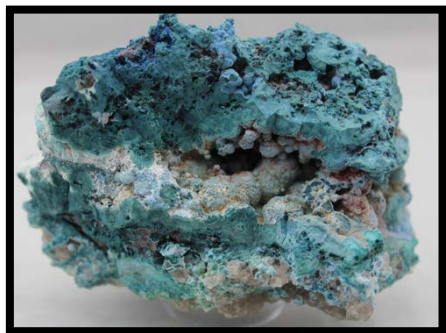

We will continue to post minerals from the large inventory that we have amassed to the above shops and as always, you can always reach Christine or Lora at #800-941-5594 or via email at [info@celestialearthminerals.com](mailto:info@celestialearthminerals.com).

All of us at Mineral of the Month Club and Celestial Earth Minerals thank you for being with us on this journey and wish you and your family all the best of health, wealth and happiness.

## **Featured Mineral:**

This month the featured mineral is shattuckite from the Omaue Mine near the town of Opuwo in the Kunene Region of far northwestern Namibia. It is a copper bearing mineral that has vivid

bright blue to greenish blue coloring. Your specimens will consist of botryoidal structures of shattuckite on a matrix of milky quartz.

You can also purchase the shattuckite in larger sizes represented in the photo to the left through the website.

Click on this link to purchase: [www.celestialearthminerals.com](http://www.celestialearthminerals.com)

Note: Click on the Monthly Offerings tab from the drop down menu.

### **Monthly Offering:**

The monthly offering is a druzy blue chalcedony from Namibia that we picked up at one of our trips to the Tucson Gem & Mineral show. Chalcedony is a variety of quartz with a cryptocrystalline structure that has been collected throughout the millennia and used by many cultures in meditation and ritual practices. These beauties are sure to enhance any collection.

Click on the link to order: [www.celestialearthminerals.com](http://www.celestialearthminerals.com).

Note: Click on the Monthly Offerings tab from the drop menu.

**December's featured mineral:** Hemimorphite will be in your last shipment in December.

**Social Media:** Visit our Pinterest, Instagram, and Facebook accounts. In the Pinterest account there are folders that show previous and upcoming featured minerals as well as other mineral and nature folders. On Instagram and Facebook we post fun information on mineral collecting as well as posts on upcoming featured minerals. **Pinterest:** celestialearth, **Instagram:** celestialearth **Facebook:** Mineral Crew and Celestial Earth Minerals
